Contestant #4398

Objective

- I want to pursue a major in Computer Science with a minor in Computer Engineering to contribute to a shared dream with my elder brothers: creating an engineering company focused on passion projects like building robots, developing awesome video games, and bringing to life the ideas we've imagined since childhood. Through this journey, I hope to inspire others to explore STEM fields. Later in my career, I aspire to become a high school teacher in game design, using it as a fun and engaging way to spark interest in technology and creativity among students.

Experience

- **Lab Assistant**
  Jenkins Robotics   2021-Present
  - Researches possible projects, assists in tasks

- **Generative AI Apprenticeship**
  Bayah Group   June-August 2024
  - Developed professional communication and LinkedIn skills.
